

DECEPTIVE BORDER NUMBERS: FUNNELING ILLEGAL ALIENS THROUGH PORTS OF ENTRY

Robert Law & Kristen Zicarelli | March 2023

THE BIDEN ADMINISTRATION'S NEW POLICIES ARE NOT FIXING THE BORDER CRISIS—THEY ARE COVERING IT UP.

Announced this January, the Biden Administration's [new border plan](#) is designed to make the number of illegal aliens apprehended by Border Patrol agents decline by redirecting them to cross at Ports of Entry (POEs). However, the result is the same: a mass release of illegal aliens into American communities.

THREE WAYS THEY ARE MAKING THE NUMBERS DISAPPEAR

①

30,000 illegal aliens per month unlawfully **paroled** (released) into American communities are not being included in border apprehension data.

②

Tens of thousands of illegal aliens per month who make an appointment through the CBP One App are being **waived through POEs** and not included in border apprehension data.

③

Removing aerostats as a surveillance tool will limit the ability of DHS to account for the number of **"gotaways"** (those who escape apprehension at the border) and will lower the total of known gotaways.
